Task Description	Assigned to
Plan development methodologies in HTML, CSS, Javascript, SQL	All
Determine style of website (font, colors, etc)	All
Create static interface for UI: Login Screen	Sameer
Create static interface for UI: Sign up Screen	Sameer
Create static interface for UI: Main Screen	Sameer

---

Research potential use of Node.js	Priscilla
Research potential use of AWS	Brenda
Research potential use of Microsoft Server SQL Management	Ally
Finalize database implementation	All
Create Heroku repository to host website	Sid

## Minutes from Previous Meeting

In our SCRUM Meeting 1, we discussed what tools will be used to create our website. Sameer will continue working on the static interface in the coming days. We have decided to utilize Node.js for the backend to connect to Heroku's PSQL database, however some research will have to be done on how Django will pull form data from the static web pages. Everyone was tasked with continuing research and understanding how to use our tools.
