Test all of the features and do the overall correctness test	All
--	-----

Minutes from Previous Meeting

SCRUM meeting 2 consisted of discussing how we implemented the filter for visually impaired users and decided that we will be using a location finder API instead of the translate API. We researched how he will implement the additional 2 APIs, which will be the speech to text and location finder. We were also able to implement the logout button. Finally, we discussed how to test all of our features and assigned testing roles for all the team members.
